Arlington, VA 22209

Acknowledgments

We wish to thank Catherine Ailes, Director of the SRI Science and Technology Policy Office, for her suggestions, guidance, and administrative leadership during the course of the study.

We are deeply grateful to the people whom we interviewed, who shared their knowledge and insights with us. Their names and affiliations are listed below. We especially appreciate the criticisms and suggestions of the following people, who took the time to review our draft cases and provide corrective and supplementary information: Morton Schwartz, John Whinnery, David Hughes, Don Pederson, Melvin Breuer, Jim Mikulski, Jeff Hecht, Phil Porter, Al Michaelsen, and Don Keck. Errors of fact or interpretation that remain are entirely our responsibility.

Special thanks to Linda Parker, technically our project monitor but in practice our colleague, who assisted us in many ways and advised us wisely throughout the course of the study.

We acknowledge the financial support of NSF and its institutional wisdom for agreeing to support an extensive, retrospective study of processes of technological innovation. Of course, the conclusions reached and interpretations offered in this report are ours alone and do not reflect the views or official position of the Foundation.

Finally, our thanks to members of our Technical Review Panel, whose continuing interest, support, and constructive criticism have greatly strengthened the study.

Persons interviewed for the study:

Optical Fiber Case:

Peter Schultz
President, Heraeus Amersil Inc.

Robert Reynick
National Science Foundation

Donald B. Keck
Corning Incorporated

John Hurt
National Science Foundation

Alfred L. Michaelsen
Corning Incorporated

Morton Schwartz
Alpharetta, GA

Elias Schutzman
Silver Spring, MD

Jeffrey Hecht
Auburndale, MA

Frederic Quan
Corning Incorporated

David Duke
Park City, UT

John R. Whinnery
University of California at Berkeley

Amnon Yariv
California Institute of Technology

Tyrone Mitchell
Corning Incorporated

Gilbert B. Devey
National Science Foundation
W. Lance Haworth

National Science Foundation

Cellular Phone Case:

Robert O. Harger
Rockville, MD

Philip T. Porter
Colts Neck, NJ 07722

Theodore S. Rappaport
Virginia Polytechnic Institute

Sheldon Hochheiser
AT&T Archives

Mary Edith Arnold
Motorola Museum of Electronics

Robert F. Roche
Cellular Telecommunications Industry Assn.

Martin Cooper
Chairman, ArrayComm, Inc.

James J. Mikulski
Motorola

George L. Turin
University of California at Berkeley

Donald Cox
Stanford University

CAD/EC Case:

Walter Rhines
Mentor Graphics, Inc.

Ronald Rohrer
Carnegie Mellon University

William McCalla
Cadence Design Systems, Inc.

Hermann Gummel
Lucent Technologies, Inc.

Melvin Breuer
UCLA

Patrick Pistilli
Boulder, CO

William Howard
Scottsdale, AZ

Donald Pederson
University of California, Berkeley

Daniel Siewiorek
Carnegie Mellon University

Gary Hachtel
University of Colorado

Robert Grafton
National Science Foundation

John Lehmann
National Science Foundation
