SRI’s clients and partners benefit from the multidisciplinary expertise of our research staff and strict adherence to regulatory guidelines. We partner with pharmaceutical and biotech companies, government agencies, foundations, and academic organizations around the world to provide research and services that span all stages of drug discovery and preclinical development leading to human clinical trials.

Your strategic resource.

Your goals are our top priority. SRI provides outstanding customer service combined with a commitment to scientific excellence through best-in-class research and development.

Quality. Value. Results.

We understand the pressures of a highly competitive market. Our expertise, state-of-the-art facilities, and advanced technologies will help you accelerate along the product development continuum. Count on SRI for cost-effective drug discovery and preclinical development results. You can depend on us to get it right the first time.

Passion. Commitment. Leadership.
At SRI, we believe in making a difference. Our professional teams provide unparalleled expertise in developing innovative solutions that meet your specific needs. Backed by decades of experience, we will confront your biggest challenges and exceed your highest expectations.

About SRI Biosciences
SRI’s Biosciences Division carries out basic research, drug discovery and drug development, and provides contract services. SRI has all the resources necessary to take R&D from Idea to IND and Beyond—from initial discovery to human clinical trials—and specializes in cancer, immunology and inflammation, infectious disease, and neuroscience.

SRI’s product pipeline has yielded marketed drugs, therapeutics currently in clinical trials, and additional programs in earlier stages. In its CRO business, SRI has helped government and other clients and partners advance well over 100 drugs into patient testing. SRI is also working to create the next generation of technologies in areas such as diagnostics, drug delivery, medical devices, and systems biology.
