

Clinical Trial and Strategic Development Services

**Optimize efficiency and results /
Reduce downstream development risk**

SRI Biosciences' leadership in drug discovery and translational development offers expanded clinical trial and strategic development services from concept to clinic, from "Idea to IND and Beyond"[™].

Clients can benefit from SRI's medical expertise for clinical trial execution and strategic guidance. With our team of strategic partners, we offer a full scope of services for clinical trials - from protocol development to final clinical study report, including clinical study monitoring, data management, pharmacovigilance services, biostatistics, and medical writing.

Clinical Research

- Drugs, biologics, and medical devices
- Early clinical, First-in-Human, with patients and healthy subjects
- Single & multiple dose, and integrated single & multiple-ascending dose studies
- Bioavailability / bioequivalence studies
- Food effect studies
- Drug-drug interactions
- Can serve as a study site for Phase 2, 3 and 4 trials

Key Services

- 24-hour medical monitoring and on-site physician availability
- Electronic data capture
- Human sample analysis
- Clinical pharmacology, PK/PD analysis
- Coordination of Institutional Review Board (IRB) review of studies

Facilities and Resources

- 13-bed, 3-infusion chair state-of-the-art facility
- State licensed pharmacy
- USP-797 Certified for low/medium-risk compounding
- ISO Class 6 clean room
- DEA license for Schedule II-V drugs
- High caliber network of clinical experts in numerous therapeutic specialties, supported by adept professional staff
- Conveniently located in Plymouth, MI, minutes from Detroit Metropolitan Airport, and central to Ann Arbor, Detroit, and Royal Oak academic medical research centers

Integrated Support and Strategic Development

- Expert strategic development support
- Creation/refinement of target product profiles
- Integrated plans to mitigate risk

Drug Development and Formulation

- IND-enabling preclinical studies evaluating animal efficacy model data, pharmacokinetics, toxicity and drug safety
- Dosage form development and cGMP manufacture of investigational products
- Biomarker discovery, development and validation from preclinical to clinical studies

From Idea to IND and Beyond™

SRI Biosciences is a well-established, trusted source for a wide array of contract services under the highest industry standards. With deep scientific resources and expertise, we take R&D from idea to discovery through the start of human clinical trials.

SRI International®

SRI International creates world-changing solutions making people safer, healthier, and more productive. SRI, a research center headquartered in Menlo Park, California, works primarily in advanced technology and systems, biosciences, computing, and education. SRI brings its innovations to the marketplace through technology licensing, spin-off ventures and new product solutions.
