SRI's Center for Innovation Strategy & Policy

Science and Technology Program Support

Analytical, research, and project management support for government S&T and innovation programs
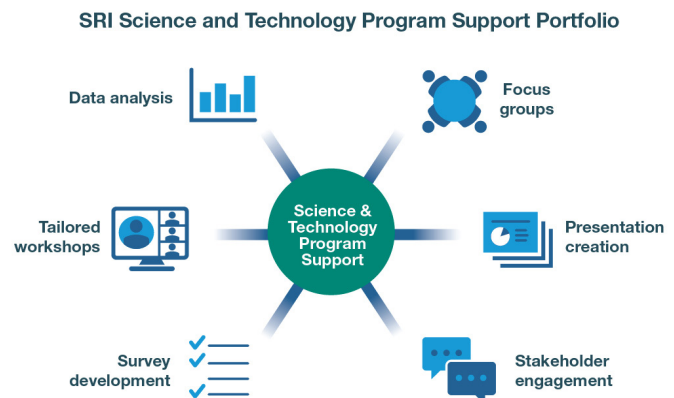

SRI supports science and technology programs by leveraging decades of applied research, analysis, and program management experience. Our hands-on approach to program support ensures that the unique needs of clients are met with a multidisciplinary team capable of conducting large-scale data analysis, program evaluation, and stakeholder engagement.

CISP's client services specific to this practice area include:

- Conduct workshops, interviews, and surveys across a wide range of stakeholders to define program objectives, identify emerging trends, and recommend novel ways of innovating

- Collect and analyze datasets in order to understand public attitudes toward science and technology, higher education, and high-technology industries and trade

- Develop interactive visualizations, white and green papers, and presentations

- Perform comprehensive typology of program data and recommend improvements to data collection processes
