

# Medicinal Chemistry Strategic Guidance and Consulting Services

Accelerating Research Programs Through Drug Discovery Stages

SRI's Medicinal Chemistry Strategic Guidance and Consulting Services offer flexible, cost-effective solutions wherever a client's program is on the drug discovery pathway. Individual study services and turn-key programs are customized to meet program goals.

Our services can respond to the growing need for an expedient process to move research & discovery projects efficiently to the next stage.

We engage with clients to understand their project needs, then match them with a medicinal chemistry consultant from our team of experts.

These experts provide overall program review and guidance and will author medicinal chemistry discussions for funding proposals.

We have the expertise to offer guidance for

- Assessing drug-like properties
- Creating a candidate product profile
- Developing optimization strategies
- Designing new analogs
- Improving compound properties
- Troubleshooting specific optimization issues
- Assessing progress
- Expanding intellectual property

With more than 50 years of experience in small molecule drug discovery spanning multiple therapeutic areas and indications, our medicinal chemistry consultants work with

- Start-ups
- Biotechs
- Nonprofit and academic institutions
- Companies looking for external review and ideation

Our highly proficient chemistry consulting team addresses projects across multiple therapeutic areas, including

- Cancer
- Infectious diseases
- Inflammation
- CNS diseases
- Metabolic diseases

### Additional Services

Client investigators can also request validated testing, custom assay development, and custom synthesis by contacting SRI Biosciences' Medicinal Chemistry Consulting Team.

### Idea to IND and Beyond™

SRI Biosciences is a well-established, trusted source for a wide array of contract services under the highest industry standards. With deep scientific resources and expertise, SRI has a rich history and quality reputation for discovering and developing novel “first in class” drugs; from the original idea or concept through the FDA Investigational New Drug (IND) application and into clinical trials.

Let's discuss how SRI Biosciences can help you achieve your research goals.
