Appendix A: Interview Questions: Principals, Teachers, and Students

Principals in Schools Using the Tablet PCs

- Tell me your favorite story about a student or teacher using a Tablet PC, perhaps something that surprised you.
- Tell me about a time when you felt that the Tablet PCs were working really poorly—when things just didn't work out.
- Why did you decide to adopt the Tablet PCs in your school?
- How did the students' parents react to the news?
- What challenges did you foresee for the teachers using the Tablet PC? Did those challenges actually happen?
- Tell me about the reaction from the business leaders in Singapore. Do they see this program as developing necessary job skills?
- Do you foresee a cost-savings in delivering a curriculum in electronic form (e.g., electronic textbooks)?
- What questions do you get most asked by visitors about Tablet PCs?
- What do you wish they would ask you?
- Is there anything you would like to add about your experience with the Tablet PC program?

Teachers Using Tablet PCs

- Tell me about a time when you felt that the Tablet PCs were working really well.
- Tell me about a time when you felt that the Tablet PCs were working really poorly—when things just didn't work out.
- Are the Tablet PCs working out as you expected? What did you think would be different? What turned out as you expected?
- Do the students use the Tablet PC different than they use laptops or desktops?
- Tell me about a time when students collaborated around the Tablet PC
- Do you let your students use the Tablet PCs whenever they want?
- Have you ever used an electronic whiteboard? If so, how is it different from the Tablet PC (if you have a projector with the Tablet PC).
- Is casual use by the students distracting?
- Is it easier to manage work in your classroom with the Tablet PC?
- What claims are you confident about saying about the relationship between the Tablet PC and student's learning?

- What type of student does best with the Tablet PC?
- What type of student does the worst with the Tablet PC?
- Does the Tablet PC restrict more gifted students or enable disabled students?
- Are there ways that the students use the Tablet PC that interferes with your management of the classroom?
- What was the most creative activity you ever saw a student doing with the Tablet PC?
- Briefly describe the training you had on the Tablet PC before you began using it? Did that training make you feel more prepared to teach using the Tablet PC?
- Do you think most of the teachers using the Tablet PC feel comfortable teaching with them? For those who are not as comfortable, what do they not like?
- What questions do you get most asked by visitors about Tablet PCs?
- What do you wish they would ask you?
- Is there anything you would like to add about your experience with the Tablet PC?

Students Using Tablet PCs

- What was your favorite activity with the Tablet PC?
- What was the best class presentation you did using the Tablet PC?
- Do you take your Tablet PCs home? How do you use it at home?
- Do you feel that sometimes the teacher wants you to use the Tablet PC one way and it seems more natural to use it another way?
- What would you change about the Tablet PC? For example, make it lighter, smaller, or easier to carry?
- Tell me about reading books using the Tablet PC?
- How do you decorate your Tablet PC?
- Can you use your Tablet PC during school whenever you want?
- Does the battery last long enough? Do you feel that you need to be near a power source?
- How do you study using the Tablet PC?
- Are group projects different now that you have Tablet PCs?
- How is your classroom different since you've been using the Tablet PC? Do you like it more or less?

Appendix B: Definition of Codes for Open-Ended Student Responses

Part of the survey taken by Catholic High School and Crescent Girls' School students contained open-ended questions about the different ways students used the Tablet PC and what they liked and disliked about it. This appendix provides the coding categories that were devised during analysis of the responses. These categories were used to produce summary statistics for the different student responses.

Briefly describe 5 different ways in which you plan to use the Tablet PC in the future

- Internet Research: It involves any kind of online research. Usually, when students say that they use the computer to do research for homework, they refer to online research, like “gathering information” or “researching on info for homework.”
- Homework/Project: It refers to computer use for any kind of work that students do for school, like “researching for projects” or “working on book reports.”
- Design Web site: It includes answers that mention the creation or design of a personal Web site or a Web site for a project, like “I can design a Web site for PBL.”
- Art: It refers to any kind of computer skill oriented to design anything that involves aesthetic creativity, like anime, music videos and drawings. Some examples are “make a music video” and “creating, editing videos/movies.”
- Presentations: It refers to the explicit mention of students to use the computer to show their work to others in the school.
- Note-taking: It includes any mention of the use of the Tablet PC for note taking in class.
- IT Skills: It includes any mention of improving students' capacity to work with computers, like “learning independently and broaden my small horizon” and “programming.”
- Games: It refers to the specific use of the Tablet PC to play any kind of game.
- Study: It includes any mention of studying using the Tablet PC, or doing any reading or writing for school.
- Communication/Relationship: It refers to the use of the Tablet PC to communicate and/or to improve relationships with others. This category includes e-mailing, chatting and finding people online. Some examples are “interacting with my friends” and “talking to friends online.”
- Organize: It refers to any mention of using the Tablet PC to organize schoolwork and/or personal files into folders, like “planning my timetable” and “using it to organize my information.”
- Collaboration: It includes statements that refer to collaboration with others as a means to produce school related or personal related work, not just as a means to improve relationships. Some examples are “help my friends in learning” and “do more group work.”
- Music: It refers to the act of listening to music. The creation of music or music videos fall under the Art category.

- Writing: It refers to specific activities on the computer that aim to increase writing skills, like writing a document, a story, a journal article, a poem, etc. An example is “writing proposal reports.”
- Other: It includes activities like “draw mathematical graphs,” “turn the Tablet PC into a server,” “using it to check the stocks.”

Briefly describe 2 things that you like about using the Tablet PC

- Portable/Convenient: It refers to any mention to define the Tablet PC as easy to carry around and/or as convenient.
- Fast Work/Efficiency/Ease of Use: This code refers to any definition of the Tablet PC as easy to use, useful to save time, and for working faster. An example is “research can be done more easily.”
- Research on Internet: It refers to the use of Internet for research for schoolwork, not just surfing the web.
- Note-taking: It includes any mention to the use of the Tablet PC for note taking in class.
- Improved Learning: It includes answers that mention the Tablet PC as useful for students to produce better quality of schoolwork, like “it makes learning more interesting... it makes learning more fun.”
- Internet Access/Wireless: It refers to any mention of the possibility to access the Internet with the Tablet PC, like “I like the easy access to the Internet.”
- Homework/Presentations: It refers to the use of computer for any kind of work that students do for the school and/or to the explicit mention of students to use the computer to show their work to others in the school.
- Entertainment: It refers to the use of computer for entertainment, such as surfing the web, playing games, watching videos, listening to music.
- Communication/Relationship: It refers to the use of the Tablet PC to communicate and/or to improve relationships with others. This category includes e-mailing, chatting and finding people online.
- IT Skills: It includes any mention to improve students’ capacity to work with computers.
- Other: It includes answers like “different media types are available,” “to store information,” “fun to use,” and “it improves my handwriting.”

Briefly describe 2 things that you dislike about using the Tablet PC

- Battery Life: It includes answers that mention that the battery life of the Tablet PC is too short or a problem.
- Freezes/Does not work/Technical Issues: This category includes answers that mention technical problems as things students do not like about their Tablet PC, like errors on browsers, Windows problems, and when the computer freezes or “hangs.”
- Weight: This code includes any answer that refers to the Tablet PC as being too heavy.

- **Physical Discomfort:** It refers to any kind of physical discomfort that students mention as being something that they do not like. Examples are itching eyes, back pains because of the position they adopt, and aching hands.
- **Inefficient:** It refers to the productivity that students reach using the Tablet PC, and it relates to the time they spend doing their work and the quality of the work they are able to produce.
- **Slow:** This code includes answers that mention that the Tablet PC is too slow.
- **Lack of Applications/Features:** It refers to answers that mention that the Tablet PC does not have enough hardware and software, like a Firewire port, built in CD ROM, and small memory.
- **Wireless Coverage:** This code includes answers that mention the lack of connectivity of Tablet PCs due to a lack of routers or wireless connections as something that students do not like.
- **Distracting:** This category refers to answers that mention that it is difficult to concentrate in the class when the Tablet PC is on.
- **Reading/Studying:** It includes the explicit mention of studying using the Tablet PC, or doing any reading or writing for school.
- **Static Electricity:** It refers to answers that mention that the Tablet PC has static energy that hurts the students' hands.
- **Administration:** It includes answers that mention that the rules in the school control students' use of the Tablet PC, like restricted Internet connection and limited software installation.
- **Note Taking:** It includes any mention to the use of the Tablet PC for note taking in class.
- **Other:** This category includes answers like "less interaction with classmates," "the screen gets scratched easily," and "it gets too hot after a while."

Do you have any suggestions for new ways Tablet PCs could be used to improve the learning experience at school?

- **Amount of Software Available:** This code refers to answers that mention that there should be more software packages included in the Tablet PC to make learning more effective and fun.
- **Frequency of Use:** This code includes answers that say that the Tablet PC should be used more often during class.
- **Technical Computer Issues:** This code includes answers that mention that technical issues should be improved, such as more memory capacity, software to prevent the computer hanging or freezing, and an anti-squint protection for the screen.
- **Battery Life:** It includes answers that mention that the battery life of the Tablet PC should be longer.
- **Weight:** This code includes any answer that refers to the Tablet PC as being too heavy and that it could be lighter.
- **Location of Internet Access Points:** This code includes answers that mention that the Internet connection should be better and more stable, with more routers connected.

- **Work More Online:** This code includes answers that say that students should work more online, use Virtual Classroom more fully, use interactive games, and come up with a system where students staying at home can interact with teachers online for consultations.
- **Administration:** It includes answers that mention that the rules in the school should not limit students' freedom and accessibility, but that at the same time ensure that students work during class and not do anything else.
- **School Infrastructure:** It refers to answers that mention that the school should have better facilities to ensure a better use of the Tablet PC, like a room where students can go to do work.
- **Other:** It includes answers like “more power bars should be given to each class.”

Appendix C: Teacher Survey Questions and Summary Statistics

1. Introduction

This appendix provides teacher survey results in summary form for both schools. The online teacher survey asked questions regarding teacher's background, technology use, perceptions of Tablet PC use in their teaching and Tablet PC applications. The survey consisted of 54 questions which are listed, along with possible responses, in the survey codebooks in Appendix G (for Catholic) and Appendix H (for Crescent).

At Catholic High School, there were 15 teachers who completed the online survey, and 29 teachers completed it from Crescent Girls' School. Some teachers skipped a few survey questions, so the total number of responses can vary for each item. To determine how many teachers answered a particular survey question, see Appendix E of this report. Selected items that were judged irrelevant during survey administration are not reported in this document.

In this appendix, we represent the data for each survey question in graph or table form. The data are presented in the same order as presented in the survey. Section 2 contains demographic questions and reports on teachers' prior use of technology. The third section reports on teachers' use of the Tablet PC in teaching various subject areas. This section also includes data about frequency of Tablet PC use. The fourth section of the report takes a closer look at teachers' use of various applications for the Tablet PC. Section 5 focused on questions about teachers' classroom practices when using the Tablet PC, such as rating the effect of Tablet PCs for traditional, low- and high-achieving students. Section 6 contains questions about teachers' professional development experiences, in particular the training they received for the Tablet PC. The seventh section reports data about teachers' attitudes toward Tablet PC use for teaching and learning.

In the survey, teachers also completed open-ended questions about the different ways they used the Tablet PC and what they liked and disliked about using the technology. Teachers' responses on the open-ended items were incorporated into the qualitative results reported in Volume 1.

A note on formatting and data presentation: where percentages are listed, the number of responses is also given in parentheses after the percentage.

5. Positive Classroom Practices when using Tablet PCs

Would you say that the following practices occur in your classes less often, about the same, or more often NOW than before Tablet PCs are used in class? (Tick accordingly)

Students select their own research areas

Students explore a subject topic on their own.

Students research beyond their textbooks

Students use online materials for learning

Students work in groups

Students write more about a topic area

Students take quizzes and tests

Students interact with teachers

Students present work in class

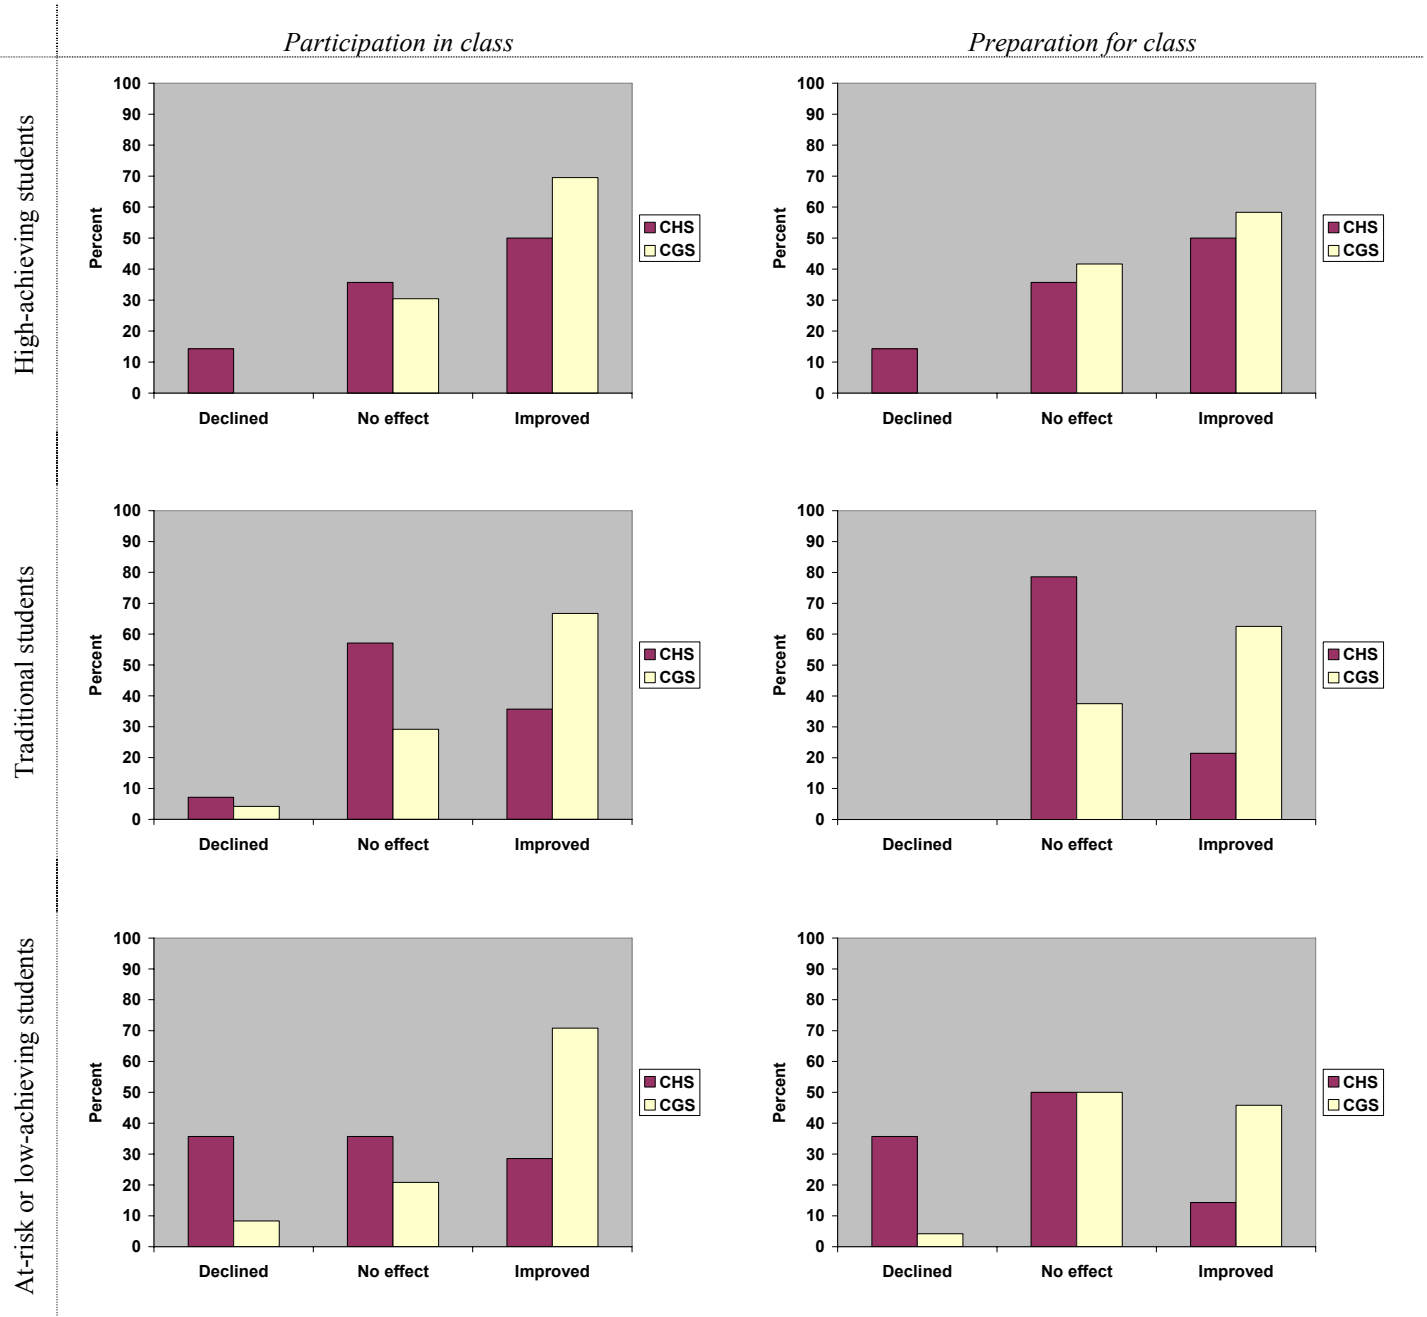

Students compose reports on the computer

5.1 Tablet PC Effect on High-Achieving, Traditional, and Low-Achieving Students

Although both CGS and CHS have students who tested very high on their Primary School Leaving Exams, the teachers still consider students to be in varying achievement levels. This section reports on teacher assessments of the effect of the Tablet PC on these different groups of students.

Please indicate the effect you think Tablet PCs have had on high-achieving/traditional/at-risk or low-achieving students in the following areas:

High-achieving students

Attendance

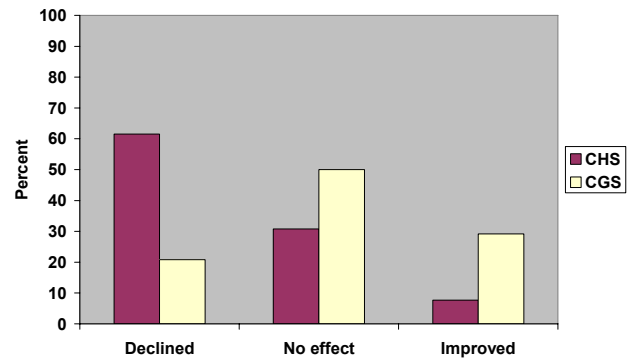

Behavior

Traditional students

At-risk or low-achieving students

Motivation

Engagement/interest level in class

High-achieving students

Traditional students

At-risk or low-achieving students

High-achieving students

Ability to retain content material

Amount of higher order thinking

Traditional students

At-risk or low-achieving students

Quality of work

Ability to work independently

7. Attitudes toward Tablet PCs

The following section is about your perception of Tablet PCs. There is no right or wrong answer. Please answer the statements honestly. Please tick the boxes that reflect the extent you agree or disagree with each of the statements given.

I feel comfortable using a Tablet PC in the classroom

I like my students to learn on a Tablet PC

I like my students to work on assignments using the Tablet PC

Even though an assignment might be submitted electronically, I still print out my student's work to grade it

I have more access to educational resources

My students find the Tablet PCs useful in visualizing concepts

Tablet PCs encourage a different form of communication between me and my students

I think that it takes a long time to finish my lesson preparation when I use a Tablet PC

Working with a Tablet PC makes me very nervous

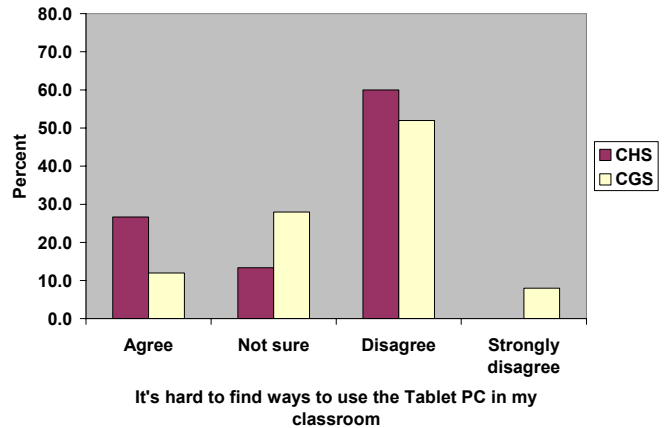

I think that Tablet PCs are easy to use

I was given enough training in using Tablet PC

It's hard to find ways to use the Tablet PC in my classroom

I was given enough training in using Tablet PC

It's hard to find ways to use the Tablet PC in my classroom

My role in the classroom has changed

I can more reliably assess student progress, work, and effort

I like to discuss schoolwork with my students using Tablet PC

My beliefs about teaching and learning have changed

I do not think that students should be allowed to use the Tablet PC whenever they want during class

Tablet PCs help me save time

Tablet PCs help the students' development of higher order thinking skills

Tablet PCs improved the students' achievement in my class

It's harder to manage my classroom when all students are using their Tablet PCs

I will be motivated to use a Tablet PC if I owned one

Every student should own a Tablet PC so that we can continue work outside classroom hours

Appendix D: Student Survey Questions and Summary Statistics

1. Introduction

This appendix provides student survey results in summary form for both schools. The online student survey asked questions regarding students' background, technology use, perceptions of Tablet PC use in their learning and Tablet PC applications. The survey consisted of 49 questions which are listed, along with possible responses, in the survey codebooks in Appendix G (for Catholic) and Appendix H (for Crescent).

At Catholic High School, there were 288 who completed the online survey, and at Crescent Girls School there were 344. Some students skipped a few survey questions so that for each survey item, the total number of students can vary. To determine how many students answered a particular survey question, see Appendix F of this report. Selected items that were judged irrelevant during survey administration are not reported in this document.

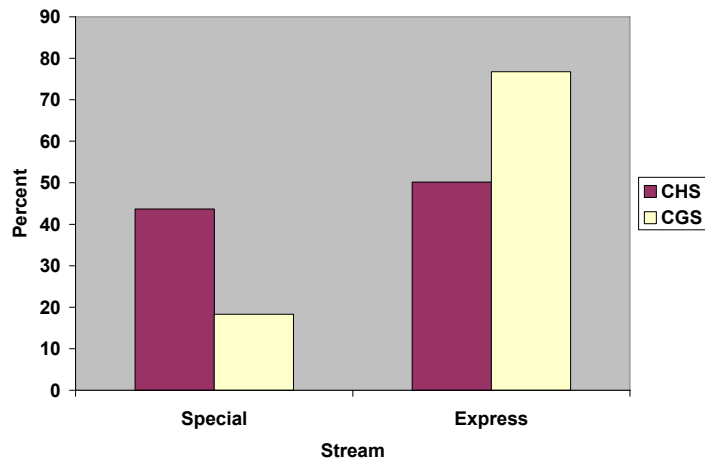

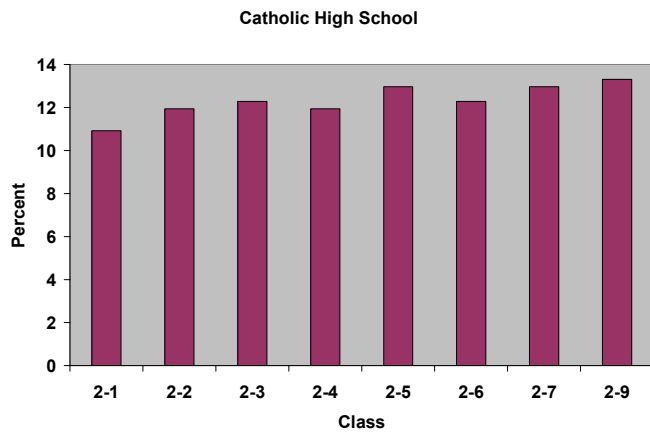

In this appendix we represent the data for each survey question using a graph or table. The data are presented in the same order presented in the survey. Section 2 contains demographic questions about student characteristics and reports on students' prior use of technology. In Section 3, students' use of the Tablet PC in various subject areas are reported. This section also includes data about frequency of Tablet PC use. Section 4 contains data about students' use of various Tablet PC applications. Section 5 reports on questions about students' perceptions of Tablet PCs and their attitudes toward the use of Tablet PCs for teaching and learning. Section 6 reports on students' perceptions of how often particular classroom practices were used after the Tablet PCs were introduced.

In the survey, students also completed open-ended questions about the different ways they used the Tablet PC and what they liked and disliked about it. Students' responses on the open-ended items are incorporated into the qualitative results reported in Volume 1.

A note on formatting and data presentation: where percentages are listed, the number of responses is also given in parentheses after the percentage.

4. Tablet PC Applications

This section includes two types of responses to two kinds of questions: (1) whether students use an application for a given subject area, and (2) the nature of their experience using this application. This section reports data from answers to only those survey questions about three of the Tablet PC applications because, during survey administration, students were instructed to ignore the survey questions about other applications that they did not use. (This is reported as N/A in the tables below.)

Below is a list of applications that are found in the Tablet PC. For each application, please tick in which subjects you have used the application and your experience using it. Tick all that apply.

Appendix G: Codebook for Catholic High School Student and Teacher Survey

This document contains the codebook information for the student and teacher survey items. The student and teacher surveys were administered online. This codebook provides information on the variable name, response categories, and type of variable for the student and teacher surveys. The purpose of the codebook is to document all survey items for communication and analysis purposes.

Survey data collected in May 2005 includes the following *Ns* for Catholic High School:

- Students: 293
- Teachers: 17

Variable naming conventions

Each variable in the datasets are numbered, and start with the letters S or T.

- S: Survey items for the student survey
- T: Survey items for the teacher survey

There are two datasets for each school. One dataset is from the student survey and the second dataset is for the teacher survey.

Missing data coding information

Missing data is coded as such in the statistical packages we used to analyze the data. There are many reasons for missing data. Every effort in quality control is made to insure that missing data did not include responses that included “not applicable,” “zero,” or “none.” Some reasons for missing data include non-response and unreliable respondent.

Appendix H: Codebook for Crescent Girls' School Student and Teacher Survey

This document contains the codebook information for the student and teacher survey items. The student and teacher surveys were administered online. This codebook provides information on the variable name, response categories, and type of variable for the student and teacher surveys. The purpose of the codebook is to document all survey items for communication and analysis purposes.

Survey data collected in May 2005 includes the following *Ns* for Crescent Girl School:

- Students: 344
- Teachers: 25

Variable naming conventions

Each variable in the datasets are numbered, and start with the letters S or T.

- S: Survey items for the student survey
- T: Survey items for the teacher survey

There are two datasets for each school. One dataset is from the student survey and the second dataset is for the teacher survey.

Missing data coding information

Missing data is coded as such in the statistical packages we used to analyze the data. There are many reasons for missing data. Every effort in quality control is made to insure that missing data did not include responses that included “not applicable,” “zero,” or “none.” Some reasons for missing data include non-response and unreliable respondent
